43's Farewell . . .

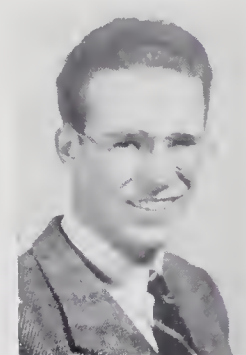

*"And when from this place
I am gone
I'll hang my head and
make dull moan."*

—J. RUDEL.

May this Tricolor help you recall those happy carefree times and pleasant associations of your undergraduate years at Queen's. Much of the blatant glamor of regular college life was not ours. These were critical days. We accepted our difficult role and despite much criticism of our privileged (?) status as students in wartime we have attempted while we were here to equip ourselves to benefit society both the immediate task of victory, by our military training, and for the future problems of the post-war world, by our academic studies. Both of these we now gratefully and freely present to our country for use as it may best deem fit.

Robert Charles Wallace

Born, Orkney, Scotland . . . Deerness Public and Kirkwall Burgh school, M.A., B.Sc., D.Sc. (Edinburgh), Ph.D. Göttingen University of St. Andrew's research scholar, LL.D. (Manitoba, Queen's, Saskatchewan, McMaster, McGill, Western, Temple, Toronto the St. Lawrence University) . . . professor of geology, University of Manitoba . . . president, University of Alberta . . . D.Sc. (Hon.) Michigan College of Mining and Technology . . . principal and vice-chancellor, Queen's.

Our Principal

I wish to write a word of encouragement to the new seed women who are going out from Queen's and to whom this Triangle will be closer more and more as the years roll past. Your coming years will not roll in easy times. The growing pressure of war needs make our contribution difficult. You have asked yourselves, many times, surely, whether you should continue to the end of your training or not. But you have persisted and you do not better try to meet the demands that may be made on you. It will be at my word for me to say that the demands will not be heavy. They will take everything you can give until victory is won. They will call for your wisdom, your knowledge, and your courage in the banding up of a world which may maintain peace with security and justice itself. For that you have prepared yourselves here.

This is my word of encouragement. Knowing that you may do in constructive effort will be felt. It will come. Our goal is the increased well-being of human community in a world of freedom. You will contribute to that great end.

May you be richly blessed in the work that lies in your hands.

Robt. C. Wallace
Principal and Vice-Chancellor

IN MEMORIAM

Professor C. E. Walker

To graduates in Commerce and Engineering of the past twenty years, Professor C. E. Walker, who died on December 14, 1942, was not merely a part of university life—he was an institution itself. To hundreds of others, he was a friendly and familiar figure, whether encountered in the classroom or hurrying across the grounds from office to class.

Margaret Harkness, Arts '42

Margaret Harkness, only daughter of Dr. H. W. Harkness, assistant professor of physics at Queen's, met a tragic death on May 2, 1942, in an automobile accident. Popular among her classmates, Margaret took an active part in student affairs, particularly in the work of the Drama Guild.

Marion Edith Hutchinson Parkhill, Arts '44

Marion Parkhill died in the Civic Hospital, Ottawa, as a result of injuries received in the disastrous train wreck at Almonte on December 27, 1942. Entering Queen's in the fall of 1940, Marion, because of charming personality, soon became one of the most popular members of her class.

QUEEN'S UNIVERSITY

CONTINGENT CANADIAN OFFICERS'

TRAINING CORPS

LT.-COL. R. D. EARLE
OFFICER COMMANDING

Military training for the year began on 26th of August when 412 Officers, W.D.C. and N.C.O.'s attended a seven day refresher course on military weapons. It was designed to train a group of instructors who would assist the A.C.T. staff at camp and during the winter months.

On 4th of September the Contingent proceeded by special train to camp at Carleton Place, near Ottawa. The camp strength of the Contingent was reduced to 304 all ranks because many students were engaged in essential war industries and were therefore, granted leave of absence.

Training at the University began on 26th of September. Great changes had been made in the syllabus with emphasis now laid on basic training. Potential officer candidates were given intensive work in battle drill, field exercises and a regularized assault course, which had been created on Leonard Field. Qualifying examinations have also been abolished for the rank and file, so that the need for an Auxiliary Battalion had disappeared. As a consequence, practically all students taking military training were enlisted in the COTC. This amalgamation increased the strength of the Contingent to 754 all ranks, including third-year Medical students who completed their military training at Christmas. Discharges for enlistment in the University Air Training Corps and for a limited number to accept

commissions in the Navy brought down a reduction of about 120.

The Contingent was inspected by Brigadier F. L. Armstrong, D.B.E., District Officer, Commanding the Eastern District of England. As the result of the N.C.O. there was no formal parade, but an informal inspection of conditions and progress in the course of their regular work.

The original Regimental Rules were modified with the security of essential food stuffs made it advisable to restrict such restrictions.

During the lecture a special course in organizational training for officers, manager officers, and sergeants was held. Five thousand words were given. This course proved to be of great value and should also increase the efficiency of the Contingent next winter because of their treatment. We will return with it.

In the past twelve months 17 members of the Contingent have proceeded to the Training Flying Centre at Brockville, Ontario and the Training Base, while many others have gone into service with the Royal Canadian Navy and the Royal Canadian Air Force. All the medical students attended the first session are enlisted in the Active Army. A selection for admission to an O.T.C. are being considered and it is expected that all men who wish will be accepted if they fulfill the necessary requirements.

FLIGHT LIEUT. FAIRBAIRN

QUEEN'S UNIVERSITY AIR TRAINING CORPS

SQUADRON LEADER TRACY

The University Air Training Corps was formed at the beginning of the 1940-41 season. The Queen's University Unit was named No. 1 Squadron (UATC) RCAF. The instructional programme was set up immediately upon formation. A number of students left for the Western Harvest in October. Many others were not taken on the strength of the Squadron until November. There were obliged to take an administrative course in order to come aboard at the start. By Christmas, despite such difficulties, the existing syllabus showed keen interest and was carried forward in good order.

The course includes both mathematics, Air Force Law and Administration, navigation, aircraft recognition, gunnery, theory of flight and engines. The course composition of the RCAF Schools, quartered at Crows, the staff of No. 71 S.T.F.C. R.A.F. at Culham Bay, and of civilian instructors from the University staff, is very gratefully acknowledged. The winter syllabus will be completed by a two-week session at Crows, when Officers and Aircrew will go to be RCAF training stations.

This report of UATC activities could not be submitted without a reference to the fine spirit that has prevailed in the Squadron. The punctuality, regularity and diligence of all concerned has been very gratifying. The men, proud to be part of the RCAF, have been alert and loyal, cheerful in co-operation and have done all they could to maintain on the Queen's campus the good name and traditions of the service.

To those in charge the year has brought keen satisfaction and high hopes for the future. By the time these words are read, many members of No. 1 Squadron will be on Active Service. Our best wishes go with them.

LEVANA WAR ACTIVITIES

1. A.R.P. course, sixteen hours, compulsory for every woman undergraduate.
2. St. John Ambulance First Aid course, fourteen hours, compulsory for every first-year student in second term and optional for upper-year students. Six hundred and twenty-five St. J. A. A. certificates and vouchers have been obtained by Levana and Q.S.S. women in the first three years of war.
3. Compulsory physical education, two hours per week, for first and second-year students. Voluntary participation in athletics encouraged amongst upper-year students.
4. Voluntary registration for work in Red Cross workroom. This is a student enterprise under the direction of ten conveners who keep the workroom open from 2 to 5, five days a week. Heavy padded quilts, afghans and knitted articles are made and sent to Great Britain.
5. University Women's Training Detachment open to upper-year students only with preliminary training of value to students who may enter the C.W.A.C. or other services upon graduation. Courses in map reading and telegraphy are given.
6. Hospital visiting and simple handicraft work in the wards of the military hospital.
7. Technical assistance at the Kingston Blood Donors Clinic, open only to upper-year students who have advanced laboratory training.
8. Committee to aid the national war service committee.
9. Course in general training for Girl Guide leadership, second term, twelve hours.
10. Evening courses at Kingston Collegiate and Vocational Institute in typing shorthand, sewing or cooking are available to Queen's students. Any class of this kind tending to make a more useful citizen is regarded as war service.

VOLUNTARY BLOOD DONORS

Last year, about 100 youngsters, or about two-thirds of the second semester, volunteered as blood donors for the Red Cross Blood Bank in London, Ontario, that for one other major Canadian University. This year Queen's seems well on the way to repeat last year's performance in spite of a late start due to the Arm harvest migration. The A.M.S. Committee with Jean Blain as chairman, has enlisted the volunteers again under the direction of Dr. Shaw.

This year the experiment is being made of sending students to the bank alone as a group, usually consisting of one of the year. This has been very successful and has fostered a great deal of friendly rivalry between freshmen and yearns after standing in line, indicating from time to time with an "availability under" sign. Most Queen's students and staff members have already qualified for the campaign, and not a few have won the silver pin which the Red Cross awards for three and six donations respectively.

Being a Journal reporter is no easy job. The only reward for good work is more work, and the sorrows of bad work are many. Yet throughout the year the paper has boasted a fine corps of loyal and able writers, whose only complaint has been that they were not given more to do.

We of the editorial board have tried to repay their interest by teaching them our little journalistic knowledge, and to guide their willing efforts toward providing efficient news coverage for our subscribers. At the same time, we have tried to focus student thought upon what we have deemed important questions, and to throw open our honestly-conceived opinions for public consideration.

Now, at the end of the year, we owe a double debt of gratitude—to our reporters for their untiring support, and to our readers for their co-operation and for the welcome sting of their criticism.

The Dean's Message . . .

Good leadership and wholesome popular sentiment depend upon each other for their existence. Leadership is successful in the long run only in as far as it is supported by the general sentiment of the people; and the sentiments of a people grow in wholesomeness only where there is the proper leadership.

The world never before needed wise leadership and enlightened sentiment as much as it does now, or as much as it will in the immediate future. Without them, successful reconstruction after the war will be impossible. Leaders without the support of the people cannot achieve it; and sentiment without leaders is helpless.

It will be for you who are now graduating to face problems more critical than any generation has ever faced before. You will have not only to provide leaders but also to promote the popular intelligence which will make leadership effective.

We who remain, however, are not sorry for you. We envy you. Pleasure in achievement is all the greater when the tasks are considered hard or impossible.

—J. MATHESON.

HISTORY OF ARTS '43

September, 1939, saw Arts '43 appear on the campus to bear the freshman's burden. The war had started, but football had not yet stopped; so that with this year's graduating class go the last of the Artsmen who had the experience of doing a night-shift on guard duty at the Stadium. The solo bass of K. C. Corbett, augmented by a select frosh chorus, dealt with the headless promenade of Anne Boleyn, while a lone bugler tore holes in the curtain of the night. In spite of the A.M.S. constitution we had two never-to-be-forgotten year parties, and we won the most points in the track meet that fall. In the spring we were ambushed by the faculty, in traditional fashion, as there were many casualties.

In the autumn of '40, the sophomores welcomed the newcomers, many of whom were to become their year-brothers. Shoulder to shoulder they stood in the campus battle. That was the year they put the tomatoes to the enemy. The Arts building reeked with vitamins for a week, and, after the Battle of the Booth, the phone didn't ring for a while. And there were eggs. It was quite a year for eggs. The Drama Guild laid one in the fall, and the '43 year party laid another. But "Charlie's Aunt," the "Follies" and the "Queen of Queen's" year dance restored the smiles. Everyone took military drill that year, in the C.O.T.C. or the Ox Batt. And there was Barriefield in the spring, tra-a-la . . . and cold porridge!!!

HISTORY OF ARTS '43

(CONTINUED FROM PAGE 40)

Came centenary year, and a lady president. Another pitched battle, with pants on the green and paint on the sidewalk, a skunk on the wire and a black hole burned in the lawn. (Et tu, Aesculapius!) Then the hundredth birthday celebration, presenting the concentrated wisdom of the years. The Governor-General spoke—remember the false alarm that preceded his arrival? The "Water Follies" and "The Pirates of Penzance" brightened up the spring term.

And so to the final year and the harvesters' special. Pitching with the wind was right in our line,

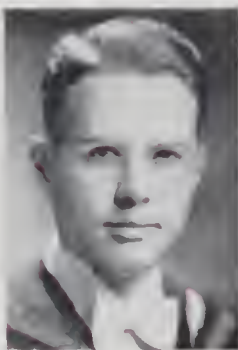

and a few weeks on the prairies broadened our little minds. Then the U.A.T.C. uniforms brought a touch of blue to the classrooms, and the assault course brought a touch of blue to the C.O.T.C. "Arsenic and Old Lace" and "Princess Ida" added a bit of humour to a term made burdensome with theses. The Arts At Home with Mart Kenny, the Levana Sea Fantasy, and the '43 year dance were the social highlights for the graduating class. Pleasant memories of pleasant years. . . .

The Dean's Message . . .

Queen's women can play a worthy part in the united effort of these stirring days, whether they be in uniform or out of it, so long as they carry to their tasks the enthusiasm of a burning desire to contribute nothing short of their best. Skill, patience, understanding, great honesty, and hard work — let us give all these, and let us think and think and keep on thinking, as today we help to build the world of tomorrow.

—A. VIBERT DOUGLAS.

MACDONNELL HOUSE

Macdonnell House was officially opened, as a French-speaking residence, in October, 1941, the aim of the inmates being to acquire as much facility as possible, in the pleasantest way possible. All French-speaking students at Queen's are cordially welcomed at the Friday teas and at the evening meetings that are held from time to time, when members of the University staff, as well as visitors from France and French Canada are kind enough to be guests of Macdonnell House, discuss historical and literary points and problems, exchange experiences, and join in singing the songs of France.

The Acting Director's Message . . .

The majority of the men in this year's class will doubtless take their place, as those of classes in the other war years have done, in the combatant branch of the services, thus postponing to a later date the civil application of the specialized business training which they have received. These may be sure that they will gain from their experience in the services a knowledge of their fellow men which will stand them in good stead when they return to civil life—a knowledge matured into wisdom by its qualities of intimacy and authenticity. The women members of the class will find abundant opportunities, in the government services or private enterprise, for the strenuous application of their trained talents to the war effort. It is to be hoped that some of them will enter the business professions, such as chartered accountancy, which hitherto have been closed to women either by law or by convention but which now clamour for their services.

The Commerce Club, now in its fourteenth year, has reached a record membership of 150 professors and students in Arts, Commerce and Science. The Club has had to dispense with its pre-war luncheons in favor of less formal evening meetings. The success of this new plan was evident from the large turnouts and the spirited discussions at the end of each address.

The year was highlighted by addresses dealing with political and economic problems of the post-war world, from Professors F. A. Knox and J. A. Carry, Mr. B. C. Butler, Associate Director of the Shipping Priorities Committee, and Mr. J. J. Deutsch, Secretary of the Canadian-American Joint Economic Committee. Also, final-year members toured the Locomotive Works.

Again this year the senior Commerce students discussed their theses with members of the junior years, and helped those in difficulty with their studies. Following its policy of bringing the student into contact with the problems faced by government, trade and industry, the Club presented many accomplished men who spoke on a variety of subjects in these fields.

The Dean's Message . . .

The younger members of this generation may justly be the objects of commiseration because they find themselves, through no fault of their own, in a world of confusion, turmoil and strife. The orderly course of their lives has been grievously disturbed and many obvious disabilities and frustrations are their lot. Yet, under these unfortunate circumstances, compensations may be discovered. It will scarcely be denied that to live in the present period, to witness and moreover to participate in, the momentous events now unfolding, must be accounted heavily on the credit side. Whether ruthless power in the hands of monstrous men, with half the world in bondage, is to be the way of life, or whether justice, tolerance and mercy are to prevail—these are among the problems whose solution is in the making.

Evidence of far-reaching changes in the social structure, bound to flow from the vast upheaval, is already apparent. The ordinary man will receive consideration hitherto denied him. Included in these changes will come new methods for the maintenance of health and the prevention and cure of disease. Indeed the practice of medicine as I have known it and to which you have looked forward, is shortly destined to undergo profound alteration. In all likelihood, before these lines appear in print, the draft of a Bill to establish a system of "Compulsory Health Insurance" will be made public. Duty and interest alike will cause you to give this plan close consideration. Your voice should be heard with respect to its adoption or to its modification.

What an attractive and all-embracing program lies before you! The immediate re-organization of the medical profession in its relation to the nation's health—active service in the fight for freedom—same part in the formation of peace—all these are your privilege, your opportunity and your right.

Surely my offering should be congratulation and not commiseration.

—F. ETHERINGTON.

HISTORY OF MEDS. '43

Six years have passed since we came to Queen's to begin the study of medicine — years of fruitful endeavour not only in our work but in all the varied activities of campus life, and years which will be the source of many happy memories in the days to come. To make a complete summary of our sojourn here in the space at our disposal is impossible, but a few of the highlights merit mention.

How well we all remember, the good old days of the freshman year — strange surroundings, the cultivation of new friendships, the sophomores and the much-dreaded "frosh" regulations, the rugby games with their pyjama parades and all the trimmings, and subjects like Physics, Chemistry, Biology and English which did not appear to bear much relation to the subject of Medicine!

Second year found many faces missing, but new ones appeared to fill in the gaps made by the final examinations of the previous May. Our introduction to the Anatomy dissecting room is something we shall always remember.

With third year, our course of study became much more interesting with subjects like Physiology, Biochemistry, Bacteriology and the latter half of the Anatomy course. What fun it was trying to digest the anatomical and physiological intricacies of the central nervous system during those last two torrid weeks.

At last came the fourth year and our introduction to the clinical aspects of the course. Another novelty centred around the work of the C.O.T.C. with its drills, lectures and map-reading, not to mention the very enlightening two weeks spent at Barriefield after the session ended. Last, but not least, was the never-to-be-forgotten trip to Toronto. Remember?

Fifth year will long be remembered as the gruelling grind of the course — a year which really served to illustrate how much there is to know, and how little have been our accomplishments in comparison.

			S. MOORE HON. A. CONVENER
		HON. DR. W. T. CONNELL HON. MEMBER	

HISTORY OF MEDS. '43

The work of the first year began with an introduction into the Army as members of Canada's Active Service Force. Classes began on June 1st in keeping with the Dominion Government's plan to accelerate the production of qualified medical men for the armed services. The highlights of this session were the Cedar Island picnic, a good time was had by all, and the annual first year dinner at the Golf Club.

In the social and athletic realm, our activities have been rewarded with very considerable success. The various year dances and private social functions have always offered the best in entertainment while this year's At Home, featuring optional dress, compared very favourably with those of the past. In football, hockey, basketball, softball, boxing, wrestling and track and field our teams and individual members invariably provided stout competition. Two interyear football championships, together with the interfaculty crown, speak well for our athletic prowess.

This review would not be complete without a word of appreciation and thanks to our teachers for the high quality of their teaching and the keen interest they have always shown in our welfare. To them go our best wishes for all their future endeavours. Let us strive to overcome those who are going ahead of us, rather than those who are the lagging of the masses. Our country and the welfare of our race will be well served by the wisdom of our leaders.

Now the end is near and graduation one of the great days of our lives is just around the corner. These are critical times and it is our lot to go forth into a world torn by the ravages of war. A world where death or disability awaits the best that is in us. It we are to do our full share in building this world a successful civilization and in winning the peace that follows. Then it is a tremendous undertaking, but one which can and must be carried out. Our best efforts only will suffice, and with them may we find good to come, happiness and contentment in the years that lie ahead.

HISTORY OF MEDS '44

The shadow of impending war became very prominent during our freshman year, but that was after we had experienced our "first" regulation, not then greatly curtailed. The removal of the high collar, arm in sling, rack for books, tradition tams, and the watchful vigilantes will long be remembered. Our second year saw us going to college with the world at war and C.O.T.C. training compulsory for all. Often to be told will be the stories of the hours spent drilling with the "Aux. Bn." Those of us who survived the first year felt we set our way toward becoming doctors when we started to study Anatomy, Histology, Embryology, Psychology,

and Organic Chemistry, followed in the third year by Biochemistry, Physiology, and Biochemistry. However, this was only our introduction to the world of medicine and great was the enthusiasm when the clinical work of the fourth began.

With the need for more doctors in the army, the "house" or medical school was abolished and the summer vacations were eliminated. As the last two years in Medicine consisted in the army, the Ministry's uniform became the everyday sign of what the well-trained Medical student was.

HISTORY OF MEDS '44

(CONTINUED FROM PAGE 71)

It was a new experience going to classes in the summer months (not very conducive to study), but the examination results still found us carrying on in good style. Now that the last year has arrived and the goal is in sight, we men of Meds '44, you can be sure, will bravely face the future and proudly and efficiently uphold and practice the ideals of our profession.

The enthusiasm for sports has always occupied an important place in our year. Our versatility in all lines of athletics is well known across the campus. In 1941-42 we won the James Bews Trophy, and in the summer of 1942 we were the Campus Baseball

Champions. Individual championships were also prominent throughout the years, and we were well represented on most of the intercollegiate teams.

Socially, Meds '44 will be remembered for the unconventionalities in our year dances. The Anatams' Pram started our social career, and each succeeding dance and party became more and more successful until we wound up with our final fling "The Esquire Dance."

Our future in the R.C.A.M.C. may appear a little uncertain to some, but wherever we go our training as Queen's men will see us through with flying colors.

CONVOCAATION

JANUARY 28th, 1943

SCIENCE

Arthur Lewis Clark

Born in Worcester, Mass. . . . educated at schools of Worcester, B.Sc. (Worcester Polytechnic Institute), Ph.D. (Clark), University of Leyden, Holland . . . professor of physics, Bates College . . . F.R.S.C. . . . member National Research Council . . . dean, Faculty of Applied Science, Queen's.

The Dean's Message . . .

The session just drawing to a close has seen a steady trend toward increased war effort. More and more have uniforms been seen in lecture rooms and laboratories and more and more have the minds of all of us been turned toward the war effort. The responsibilities placed on Science graduates are heavy. They are needed and needed badly in war industries as well as in the various branches of the armed services.

In all probability there will be too few engineers to fill all of the needs. So everyone should ask himself where he may serve best. Then, when the war is over and normal life is possible, one may think of the work for which the university course was undertaken.

HISTORY OF SCIENCE '43

Four short years ago we were freshmen. It seems hard to believe that we were once very bewildered and frustrated frosh with cropped hair and green but hopeful hearts. The heavy and exacting hand of the faculty and the sophomores increased our plight but we managed to have an enjoyable time. As freshmen we received our first but unfortunately our last taste of intercollegiate sport, with snake parades, fights, victories and the odd defeat.

The sudden graduation of our first president who disappeared in a trail of dust, left us at a low ebb, but under the guidance of our new president, Gord Tindale, we managed to survive the first hectic year.

Now in 1940 we were sophomores and what we had lost in numerical strength we had gained in spirit. We guided the dejected frosh with a firm but gentle hand and managed an excellent soph-

frosh banquet at their expense. Gord Tindale was again elected as our very able president. Due to the unceasing effort of our athletic sticks, Leo MacDonald, George Hood and Roy Menary, we won the Bewes Trophy. Our year funds were greatly reduced by a heavy fine levied by the Engineering Society for damages to the Arts Building in a fracas in which we took no part.

In the fall of '41 we returned as proud juniors to take an integral part in the campus activities of Queen's. Our new president, George Hood, and Len Lane distinguished themselves in the field of hockey. Dave Watson startled the track world by setting a new record for the 880 and the mile. We were shocked to learn of the death of Don Stirling, who joined the R.C.A.F. in his sophomore year. Our convener, Ken Rutledge, was responsible for a very

HISTORY OF SCIENCE '43

(CONTINUED FROM PAGE 84)

successful dance and year party. C.O.T.C. had now become a big thing in our lives and we had our first taste of army life at Barriefield Camp in the spring of '42.

We entered our final year in the fourth year of the war. The war and campus life, too, had become grimmer. The khaki of the C.O.T.C. and the blue of the U.A.T.C. were common sights on the campus. However, we were seniors now and, despite the lack of intercollegiate sport and the burden of military drill, we entered the home stretch with firm hearts. Don Manchester was elected president and proved an able leader. Len Lane became president of the A.M.S. by a large majority. Pete Cain, after a successful and active part in the boxing world, was elected president of the Engineering Society. Nick Wigle, as social convener with a very able committee,

is to be congratulated for an outstanding dance and year party. To Ken Rutledge, our formal convener, we owe a great deal of thanks for giving us a formal that was a crowning success and a fitting climax to our years at Queen's.

At the beginning of this year we were glad to see our goal in sight but now, when we are about to leave, we have many regrets. Queen's has become a big thing in our lives and, as to the host of staunch friends we have found, we hate to part with them—but we must forget our feelings for we have a duty to perform which is foremost in the minds of all. However, come what may, I feel sure that we as engineers shall never forget the spirit and ideals we received at Queen's, and we shall never betray the trust placed in us.

1939 . . . Aug. 22,
1940 . . . Promoted
to Assistant Principal
Chaplain, C.A.S.F.,
London, England . . .
January 1941, return-
ed to Queen's Theo-
logical College.*

The Principal's Message . . .

A few years ago the Church had difficulty in providing fields of work for all the ministers upon her roll. Today the whole position is reversed. There are not enough men, especially since the armed services have taken hundreds of the best young ministers to act as chaplains. Thus the pendulum swings. But ultimately it is always the need that calls forth the men.

Half of the senior class in Theology of Queen's is graduating elsewhere this year for quite sufficient reasons. But we shall always feel that they all belong to us. To every one of them we wish "good luck in the name of the Lord."

—H. A. KENT.

The Queen's Theological Society is composed of the students of Queen's Theological College and students in Arts who are candidates for the ministry of the United Church of Canada. Candidates for the ministry of other denominations are welcomed to the activities of the society.

Though few in number the members of the society have always made a worthy contribution to the life of the campus. This fall the Theological Society led all Faculty Societies in the production of those who gave blood donations.

As a result of the critical shortage of ministers caused by the war almost all members of the Society have charge of mission churches in addition to their regular work.

During the fall session the members have heard interesting addresses from their Pastors: Dr. W. T. G. Brown, Dr. James Smart of Peterborough, Rev. Dr. G. A. Brown and Rev. W. J. Fiddie of Kingston. Mr. H. Atkins, an Arts Theologian, was a study group on "The Mark of the Holy Spirit."

A series of present plans for administering the College. Some of the students will remain in college this summer and graduate next September.

Queen's theological students are justly proud of the traditions of their college and above all seek to be worthy of their calling to the ministry of Jesus Christ.

H. J. MILLER, B.A.
MOUNT FOREST, ONT.

ALICE A. ARMSTRONG,
B.A.
MEAFORD, ONT.

TO THE GRADUATING CLASS

Men and women of Theology, you are going into a world smashed and torn; a world in which the powers of Evil have cynically made a pact together, and have set themselves in battle array against the sacred standards of our life. The doctrines of naked materialism and brute force are laughing to scorn the spiritual values of your faith.

Your weapons are weapons of the spirit. The nation looks to you in these difficult times to inspire her people with courage and faith. In the period of reconstruction she will depend upon you to give wise counsel and initiative in bringing order out of the chaos of human affairs.

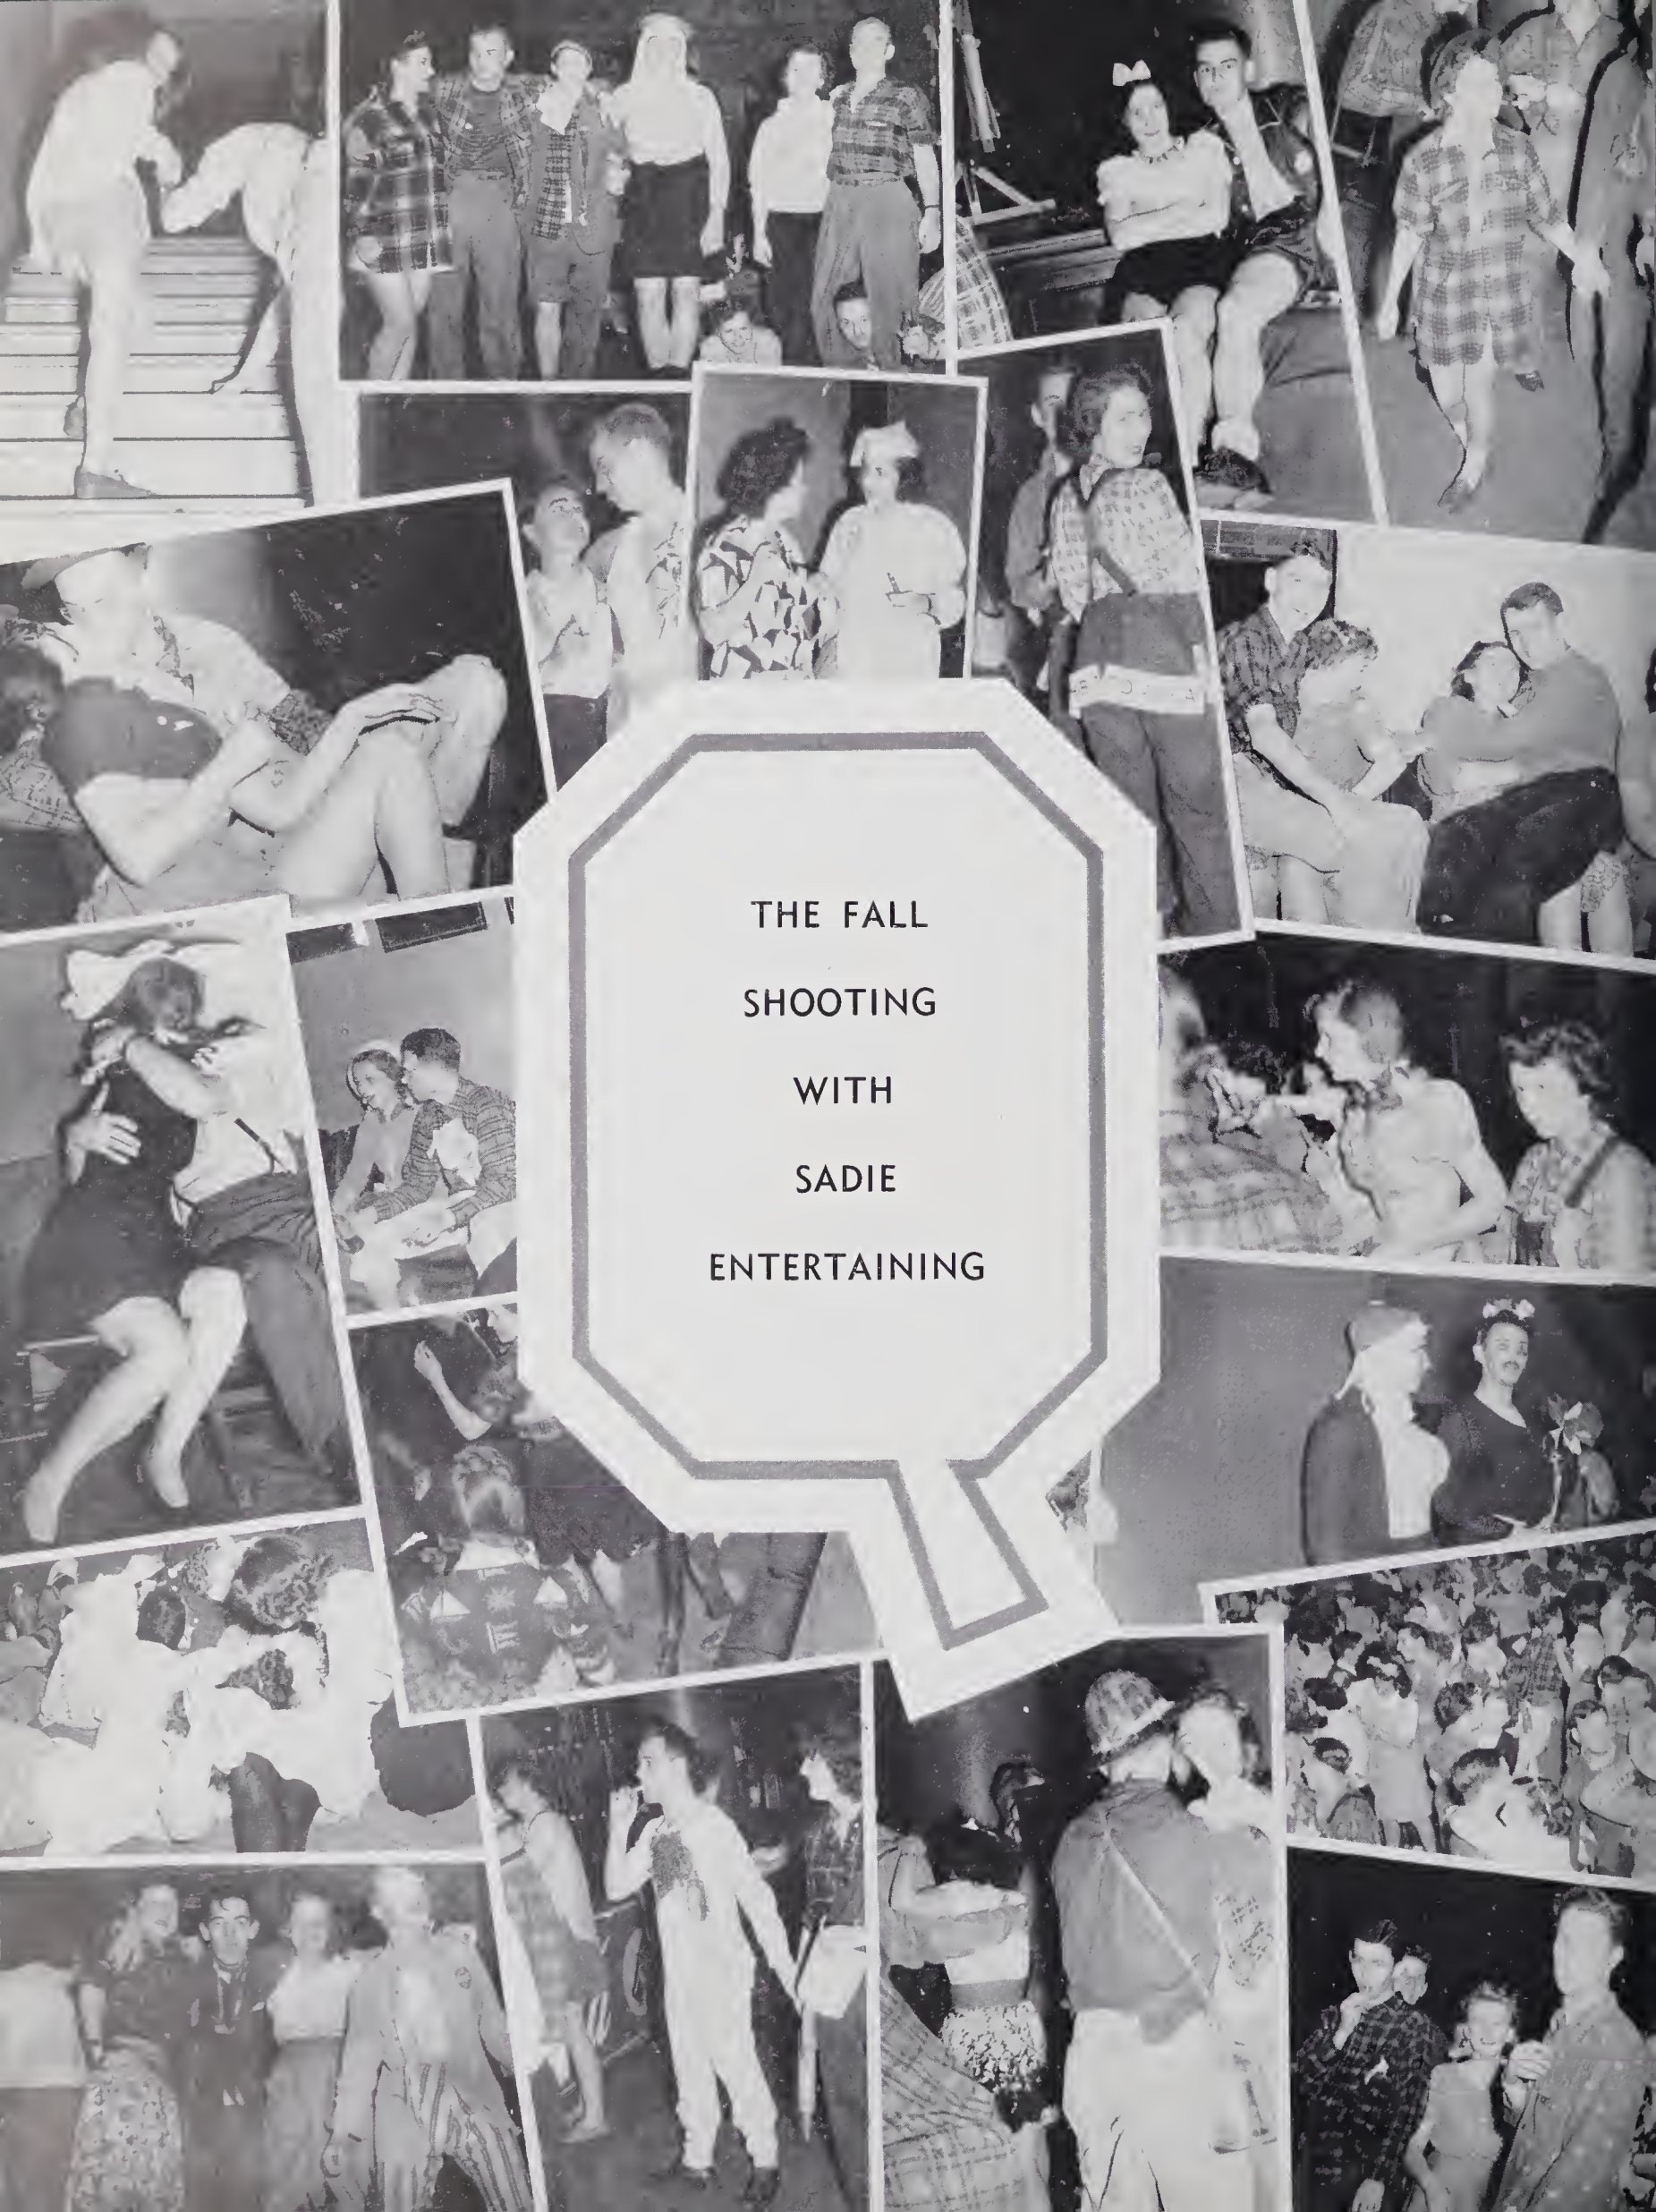

During the one hundred and one years of her life, Queen's men have given such leadership to the nation and to the world. Yours is a glorious heritage; you will be worthy of it.

"... His truth shall be thy shield and buckler."—PSALM 91:4.

—HARRY ATKINSON.

CAMPUS LIFE

THE FALL
SHOOTING
WITH
SADIE
ENTERTAINING

A collage of black and white photographs of students and faculty members, with a central octagonal frame containing the text "OUR SOCIAL SCIENTISTS AND STUDENTS OF THE HUMANITIES!". The photographs depict various scenes: students in classrooms, faculty members, students in social settings, and students in outdoor activities. The central text is arranged in a vertical, centered format within a white octagonal frame with a dark border. The background is a dense arrangement of overlapping photographs, some showing groups of students, others showing individual faculty members, and some showing students in social or outdoor settings. The overall theme is the social sciences and humanities, as indicated by the central text.

DOUGLAS LIBRARY

THE DOUGLAS LIBRARY

The first-year student at Queen's finds the University Library so friendly that he drives for his reading in the Reading Room. Within a week he has been taking it in. And by the Librarian on a tour of the stacks and has had the catalogue explained to him. "Usually without result," says being required for the examination of all those cards. What he does grasp is that no one shall be any longer that they are quite a lot of books in the room and that if he knows what he wants he can get it. If he doesn't know, help is available.

Within a month he is moving fully and has mastered the Reading Room and the Information Desk and (once he has) has turned up a magazine dealer. By the end of the season he knows some of the books in the library and (before) whether cheerfully on the stairway and refers to the building as "The Lib." Later a number of the Graduate Class does concerning Books, Indexes and the English guide, an expert with the catalogue and the manual. He is surprised how much the library can be to him and makes up his mind to keep on there with freedom at least he leaves Queen's. (Good luck to the resolution!)

FORMALS

MEDICAL AT HOME

The Medical At Home was the highlight of the fall season. Introducing a new standard for war time formals, the Medicas adopted a dress optional policy which received campus wide approval.

In a salute to the Royal Canadian Army Medical Corps which formed the theme of the decorations the congenial atmosphere of Grant Hall was enjoyed by the happy dancers as they swayed to the pleasing rhythms of Margan Thomas's sweet and low music.

"The most pleasant evening of my years at Queen's" was the general opinion expressed by everyone present at this memorable At Home

—Gus Hood, Convener.

ARTS AT HOME

On January 22nd, the Arturians congregated in Great Hall to enjoy their Annual Ball.

This year, due to the exigencies of the times, informality was the keynote of the evening.

The success of the dance can be largely attributed to Miss Kewley and her talented band who, on their third successive appearances, again thrilled the dancers.

This year's version of the Arts At Home, for those who attended, will remain a memorable highlight of their college life.

FRANK NASH, Convener

SEA FANTASY

January 28th and 29th saw Ban Righ Hall transformed into an aquatic paradise with bright tropical fish, multi-coloured corals and graceful sea birds lending the atmosphere for the 1943 Levana Formals.

Music was provided by Sandy Runciman and his orchestra and all combined to make the Sea Fantasy one of the most memorable events of the social year.

—Audrey Hollis, Convener.

SCIENCE FORMAL

The Engineers again acted as host at their annual Science At Home in Grant Hall on February 12th. The RCAF Central Dance Band from our capital city played its rhythm for the Engineers and their many guests under a most fitting setting of airplane hangar, ballroom and theatre.

Although the highlight of the decorations was the transformation of the stage, equally impressive were the working model of a mine and the cut-away model of a "Chrysler" engine.

With the passing of the Science Formal, the social functions of the Science Faculty came to an end, but the closing was one that will never be forgotten.

STUDENTS' UNION HOUSE COMMITTEE

The Memorial Union, founded by the late Col. Wilgar, is the centre of campus life. The spacious Common Room provides recreational facilities for billiards, bridge, chess and checkers, while the Memorial Room provides a quiet atmosphere for study. The Cafeteria, discontinuing evening meals, has done an excellent job in feeding the increased number of students this year.

• • •

In November the Guild presented "Distant Point," a Russian drama by the hero Soviet playwright, Afinogenov.

"The best play in years" was the way everyone greeted the Broadway farce, "Arsenic and Old Lace," when the Guild presented it on the Campus, for the R.A.F. at Rogers' Airport, and in K.C.V.I. for the Kingston War Services Commission.

A series of one-act plays was presented at the local military camps.

Traditionally a Scottish college Queen's boasts one of the few all-student pipe bands in the world. The band is maintained entirely by the student body through the control of the A.M.S.

Under the expert tutelage of Reg. Hanna who assisted by Colin Blyth and "Sergeant" MacLachlan the band is growing steadily and has a membership of twenty-one including three co-eds. From the brass band a scholarship was held out for the best pipe in the combined year.

Newman clubs exist in various universities for the benefit of Catholic students. Its functions are two-fold - religious and social.

Monthly Communion breakfasts, a yearly retreat and week-end group meetings fulfil its first requirement. The clubs social activities consist of dances and outings throughout the year.

Newman Club of Queen's celebrated its twenty-fifth anniversary this year. Mass events were held to mark the occasion and will culminate in an inter-collegiate Convention of Canadian Newman Clubs planned to be held at the campus in November.

QUEEN'S DEBATING UNION

The aim of the Queen's Debating Union is to give everyone who so desires an opportunity to develop his talents for public speaking.

In the revived Intercollegiate Debating League, Queen's debaters defeated Varsity in Toronto and dropped decisions to Ottawa University at Queen's and to McGill at McGill. Earle Baxter and Vern Malach were our winning debaters, while Jack Wheelton, Pat Macdonald, Norm Rogers and Jim Richardson lost close decisions.

• • •

Celebrating its tenth birthday, the International Relations Club had a most successful year. With international problems so directly affecting campus affairs, interest in the bi-monthly informal discussions led by professors was keen. This year joint meetings with the Kingston Branch of the League of Nations Society were a new feature in the club's program.

ATHLETICS

R. SERIGHT

BILL LEMMON

R. ELLIOTT

ATHLETICS AT QUEEN'S

In 1939, when the Bews Trophy was first presented for Intramural competition, only about fifty percent of the male students took on active part in the new sports programme. The majority were still hoping, in vain, for the return of Intercollegiate sports, or thought themselves not quite adept enough to participate in the Intramural schedule.

Four academic years have passed. Each session has seen an ever-increasing number of so-called "mediocre" athletes turn to athletics for relaxation and conditioning. In rallying to the cause, namely the now highly-coveted Bews Trophy, they have not only gained valuable points for their respective years but have added a new Queen's spirit of fair play through the association with rival years and their own teammates.

It is a personal triumph for Sub-Lieut. J. F. Edwards, now on leave of absence, who set up the present programme, that such a system should gain such rapid popularity in the now crowded student curriculum.

During the first year of the Intramural Director's absence we have tried, with the able assistance of R. Seright, Physical Director, the Faculty Athletic Sticks, the Ski and Boxing and Wrestling Clubs, and W. Roberts, Swimming Instructor, to carry on the programme laid down by Johnny before his enlistment.

True, some minor changes have had to be made in the rules to meet the ever-changing conditions about the campus during the present emergency. But with the whole-hearted co-operation of the student body, the Year Athletic Sticks and the A.B. of C. Secretary, Mr. C. Hicks, the 1942-43 Intramural Sports Programme has eclipsed all previous years in the number of participants in nearly every event. Over eighty percent of the male students took on active part in two or more competitions during the session. That record in itself is one that the students might well be proud of, even in peacetime.

SENIOR FOOTBALL

After a two years' lapse the Tricolor again appeared in senior football. Playing in an Army league, the collegians showed that they still had the material for the now-banned Intercollegiate competition.

Under the able guidance of Bob Elliott the club broke fast with their first game and were never headed throughout the entire schedule.

A seasonal score of 110 to 6 is an achievement of which one can be justifiably proud.

With three or four men still remaining from pre-war Intercollegiate squads to leaven the pick of last year's Juniors, Bob had an excellent paper team which he soon transformed into an unbeatable combination. Coached to perfection by Captain Bean there was a hard-charging line with plenty of initiative and experience, behind which a versatile and fast backfield were able to perform to best advantage. The new five-yard interference rule permitted an entirely new type of game. The Notre Dame shift, floating insides, cross-blocking and, above all else, speed, transformed the Tricolor from a

two-bucks and a lark. Much as we were titillating razzle-dazzle sound that still had plenty of punch when the next arose.

The first game was on a rainy afternoon and the boys had to play it safe till they got in their sea legs. Ordronox H.Q. went down 10-0. On the next Saturday the land tide began. Driving bucks, spirits around and on a bewildering array of plays, beat the Varsity. Other Risks 25-0 before the Triathlon found out the crowd. Still featuring the last game, Queen's played Ordronox Bernhardt's 4-0, the second highest score at Curlew this year, and prepared to meet the high-ranked Varsity. With the expected loss of one plunger and the return of a fast back, the whole campaign was result in the week before. Then came Saturday and the rain. The whole week's work had to be shelved and the Triathlon dropped into the mud. Playing against a heavier and more experienced line, the Queen's line had their hands full and the first half ended with the Triathlon 11 points in the lead but with the season's first score against them. In the last half the club collected itself and forged ahead to end the season 25-0.

There were no stars. It was as a team, not a collection, that the Triathlon performed. To Jake Powell and Bob Elliott must go much of the credit for achieving this rare distinction - a winning team without a single prize winner. Indeed the quartering to score grew so great that even the former took part in some of the morning plays. On its way down field the ball would change hands two or three times and the man who eventually ended up with it could be anyone from the original ballholder to the end. That was this year's senior team - a great club and a game bunch at any.

ABSENT—MR. J. D. DAY, HONORARY PRESIDENT				

In spite of the lack of training facilities, the Boxing and Wrestling Club enjoyed an active year. The boxers were particularly fortunate in securing the services of Mr. Bob Seright, a graduate of Queen's and former Intercollegiate Boxing Champion, as coach. Aided by the able and enthusiastic Club President, Ron Haflidson, he organized a highly successful intramural assault in which were one hundred and fifty entries.

This year the club saw three new intramural boxing champions crowned. Al Moore, A. Underwood and Bruce Hawkins, in the 135-, 145- and 165-pound classes, respectively. In the other weights, Vic Bechaz, heavyweight, Gord Tindale, 175 pounds, and Ron Haflidson, 155 pounds, all successfully defended their titles.

At the time of this writing, the wrestlers were still keenly contesting the titles in all classes. Even such able champions as Kindrachuck and Sobering were finding competition.

Again this year the club members feel indebted to Jack Day, their Honorary President, for his keen interest and unfailing support.

	L. LANE	N. URIE		

The Queen's Senior hockey team was, due to the ban on Intercollegiate sports, again entered in a local city league this year. The league consisted, instead of just civilian teams as in other years, of a combination of civilian and service teams. The Seniors had a good season, finishing second in the league and losing only three games in eleven played. In the semi-finals they easily disposed of the opposition, only to lose out in the finals to the first-place team, the only team to beat Queen's all year. The squad was well divided among the four years, with the frosh and sophs providing the most talent. Four members of the team will graduate this year, leaving a big gap in the ranks. The seniors, all stars, are Len Lane, George Hood, Ken Rutledge and Don Van Camp. They were a big reason for the team's success this year and will be sorely missed when next season rolls around.

EVERY minute of the day a gun is produced in Canada; every minute 40,000 rounds of finished ammunition are made in Canadian plants. Included are eight types of artillery and field guns and 14 types of small arms, aircraft guns and rifles.

Although only one phase of Canada's vast war manufacturing program, this outstanding production of guns and ammunition indicates the skill and efficiency of Canadian industrial plants.

Among the facilities which have aided the output of guns and munitions is compressed air. This form of power works untold and important operations and processes in gun plants, explosives factories and shell shops. For many years Canadian Ingersoll-Rand Company has been engaged in the development and application of air compressors, and compressed air driven tools and machinery. This equipment is in active use in nearly every war plant in Canada.

From **MUD** to **AIRPOWER**

Aluminum has its origin in the mud-like substance, Bauxite. However, before it reaches final expression in the shape of battle planes a complicated process is required, involving the application of electrical current to extract pure metallic aluminum from aluminum oxide. Here is where Westinghouse electronic engineering contributed a vital step in the development of the Ignitron Rectifier which converts alternating current into direct current with higher efficiency than any other type of equipment.

In Wartime Industry this practical application of electronics helps the United Nations' production for Victory. . . .

THE CANADIAN MARK OF QUALITY PHARMACEUTICALS SINCE 1899

Charles E. Frosst & Co. was formed in 1899 to provide the medical profession with "made in Canada" pharmaceutical products of the highest quality. During the ensuing forty-four years, the company has grown steadily and its products have enjoyed the full confidence of Canadian physicians.

"Frosst" products contain only the finest ingredients obtainable. They are manufactured under strict control from the time raw materials reach the factory until the product is packaged. The key to this quality control is the number stamped on the label of every "Frosst" pharmaceutical.

Modern, well-equipped laboratories, staffed by a personnel with over 300 years of combined experience in medical research, have developed and improved many pharmaceuticals, thus contributing in no small measure to the advancement of medical science in Canada.

We have very little product to sell in Canada but we are playing a vital part in the effort to supply Britain with Food.

When Victory comes, we will be back soliciting business for our High-grade products in the usual way.

Write our Library for CONCRETE Information . . .

For many years we have maintained a service department which gives technical advice to Engineers, Architects and Contractors. Literature is also available for distribution

covering many uses of concrete and reinforced concrete.

If you feel that we can aid you in avoiding or reducing the use of critical war materials, or aid you in solving any of your problems relating to concrete work, get in touch with our service department.
